Preventive Maintenance Programs

Inspection and replacement of high wear parts prevent system failures caused by these parts malfunctioning.

High wear parts take the most friction from movement, pressure and extreme temperature changes.

Our technicians customize a Preventive Maintenance Program around your production facility. Identifying and replacing these parts and seals can keep a system running smoothly minimizing downtime.

DSI Preventive Maintenance Programs are...

...the most complete and comprehensive in the industry. We do extensive inspections on compressors. Besides filters and seals, we have the ability to service and replace worn or broken parts discovered during inspections. We keep a record of wear measurements on the piston and crank shaft assemblies helping to schedule maintenance vs. downtime.

Optional services including condensers and evaporator valves can be added.

For more information, talk to one of our Preventive Maintenance Service Technicians.

DSI is a  **VILTER** parts stocking distributor.
SINCE 1963
Distributor

Custom Manufactured Equipment

DSI Process Systems has expanded products and services to include refrigeration. We now manufacture plate & frame chillers, suction accumulators, skidded systems, and other related equipment.

Plate & Frame Chillers
Totally integrated and prewired for all controls, easy to service, handles a variety of fluids for chilling process.

Suction Accumulators
Custom manufactured to meet your production facilities needs with the ability for expanding capacity. Training and support included.

Project Design & Installation

Our project designs fully utilize areas available to save space while maintaining easy service access and room for expansion.

From manufacturing components to designing and fabricating entire cooling systems, DSI is your total refrigeration solution.

Technical Services & Support

Our engineers identify needs, problems and their solutions. Our technical team fabricates and installs the refrigeration equipment, net based controllers and computer consoles.

Our technicians provide outstanding training and support.

DSI is "committed to total service" from planning, engineering and manufacturing to installation, in-plant training and technical support. Visit dsiprocess.com for information about our other products and services or call us at 1-800-dial dsi.
